SkyeTek Professional Services Delivers End-to-End RFID Solutions for OEMs

Finished Solutions Delivered for Asset Management, Product Authentication, and Patron Management

Westminster, Colo., September 10, 2007– SkyeTek, Inc., the leading provider of embedded RFID solutions, today formally unveiled its professional services group which helps original equipment manufacturers (OEMs) quickly and efficiently deliver RFID-enabled finished products. SkyeTek Professional Services supports all phases of the embedded RFID development cycle including requirements analysis, design, integration, and testing. Customers gain the benefit of SkyeTek’s industry-leading experience in delivering embedded RFID solutions which results in significantly reduced integration costs and time-to-market compared to in-house implementations.

“With new capabilities such as professional services, SkyeTek continues to extend the reach of RFID into new application areas by making the process of embedding readers and tags into devices simple and efficient,” said Rob Balgley, CEO of SkyeTek. “The addition of our professional services offering enables OEMs to optimize RFID performance, network connectivity, and application integration while minimizing cost and time-to-market.”

SkyeTek Professional Services provides customers with the option of letting SkyeTek manage the full development lifecycle or choosing a la carte services which include:

- SpringBoard™ – a timely and inexpensive feasibility study for estimating the entire embedded RFID integration effort
- Integration Services – tag selection, module integration, antenna tuning / design, and network integration
- Customization Services – custom circuit boards and application development / integration
- Best Practices Advisory – regulatory certification, security review, and manufacturing support for license customers

SkyeTek Professional Services has successfully completed projects in which RFID was used in asset management, product authentication, and patron management. To view a sampling of past projects, visit:
