## **SkyeTek Delivers Next Generation Software Toolkit for RFID Evaluation and Development**

*SkyeWare 4 Provides Comprehensive Suite of Software Development Tools that Simplifies RFID Project Prototyping and Application Development*

**Westminster, Colo., November 27, 2007**– SkyeTek, Inc., the leading provider of embedded RFID reader technology, today announced the availability of SkyeWare™ 4, the company’s next generation suite of software development tools and demonstration applications. Included with every SkyeTek Developer Kit, SkyeWare 4 provides companies with a quick and intuitive interface that allows developers to quickly build prototypes and develop software that controls and manages the underlying RFID hardware.

“SkyeTek continues to experience success across many applications by providing software that allows customers to easily and effectively evaluate RFID technology, develop prototypes, and accelerate time-to-market,” said Martin Payne, VP of Marketing, SkyeTek. “SkyeWare 4 represents SkyeTek’s next generation software toolkit for RFID development. It allows developers to seamlessly configure, secure, and test multiple tag types in order to determine the optimal tag configuration for their application.”

SkyeWare continues to be one of the most comprehensive RFID reader application development toolkits available. This latest version includes the following:

- Wizard-driven setup process that automates the process of configuring the reader, antenna, and tags
- Demonstration applications in the areas of product authentication, contactless payment, access control, and item-level inventory management
- Utilities that provide an easy way to evaluate and optimize settings for anti-collision, read range, memory, and secure memory

SkyeWare 4 is currently available with the SkyeModule M4 Developer Kit and will begin shipping with all SkyeModule M2 and M9 Developer Kits on December 5, 2007. For more information on SkyeWare 4 please visit:

### **About SkyeTek, Inc.**

SkyeTek transforms RFID into networking technology enabling goods and assets to participate in a connected world. SkyeTek develops readers that serve as intelligent edge devices and software that binds policies to tagged items. By extending networks to the physical world, customers increase revenue through their ability to predict demand, prevent counterfeiting, and personalize user interactions. Based in Westminster, Colo., SkyeTek sells exclusively through OEMs, systems integrators, resellers, and distributors. For more information, visit [www.skyetek.com](http://www.skyetek.com) or call 720-565-0441.
